

## Press Release

December 7, 2015

### **Cardlink POS terminals in more than 100,000 locations in Greece**

*Cardlink manages the largest network of terminals in Greece.*

Cardlink terminals are addressed at banks, merchants and self employed professionals and are the most flexible tool for card payment transactions.

Cardlink terminals accept all cards from all banks and offer businesses and professionals the opportunity to manage all their acquiring relationships from a single terminal. They are available in desktop and mobile versions as well as mPOS versions for transactions using smartphones and/or tablets, thus covering the complete spectrum of business requirements.

Antigonos Papadopoulos, Commercial Director at Cardlink stated «Our priority is addressing the needs of the market. We have gone through a difficult period adjusting to the increased demand for terminals over the recent months. We are especially pleased for the achievement of the milestone number of 100,000 installations. All the Greek systemic banks contributed to our success, especially Alpha Bank and Eurobank who played a key role in the the creation and expansion of our network. We thank them for their trust and cooperation. At the same time, we have completed the expansion and upgrade of our infrastructure in order to meet the expectations of our clients. We are committed to meeting the needs and requests for our products, so we can contribute to the further expansion of electronic transactions in Greece».
